(54) Title: ENDOSCOPIC SURGERY DEVICE FOR THE INSERTION AND RECOVERY OF A HAEMOSTATIC PLUG AT THE SURGICAL SITE

WO 2005/053589 A1

(57) Abstract: An endoscopic surgery device for the insertion and recovery of a haemostatic plug (8) at the surgical site, comprising a tubular body (1), suitable for slidably housing the plug (8), and a plunger (4), slidably engageable in the tubular body (1) to push the plug outside thereof, and place it into the surgical site. The plug is connected to location means (10) of suitable colour, radio-opaque and floating in relation to the internal organs, blood or other liquids present at the surgical site. At the distal end (4a) of the plunger (4) means (5) are provided for gripping the location means to recover the plug after use and retract it within the tubular body.
